

ABC Global Alliance Background Information

The ABC Global Alliance, backed by the European School of Oncology (ESO), is a multi-stakeholder platform for all those interested in collaborating on common projects relating to advanced breast cancer (ABC) around the world. It is made up of people and organisations who are committed to develop, promote and support tangible improvements that will ultimately create awareness and actions that will improve and extend the lives of patients living with ABC worldwide.

The ABC Global Alliance was launched during the World Cancer Congress in Paris on 3 November 2016. It is a continuation of the work developed through the ABC International Consensus Conference created in 2011. The ABC Conference is responsible for the ESO-ESMO international consensus guidelines for the management of ABC.

Our Vision and Mission

The goal of the ABC Global Alliance is to improve and extend the lives of women and men living with ABC in all countries worldwide and to fight for a cure. The ABC Global Alliance will also raise awareness of advanced breast cancer and lobby worldwide for the improvement of the lives of ABC patients.

Our Supporters

The ABC Global Alliance is sponsored through unrestricted grants provided by Novartis, Pfizer (both main sponsors) and Lilly (sponsor).
