

# STATEMENT OF SUPPORT FOR UKRAINE

28 February 2022

The ABC Global Alliance is deeply concerned with the situation of all Ukrainian cancer patients, both children and adults.

Cancer, and all other life-threatening diseases, will not stop during this war situation. Those who are still in the war zone as well as all refugees are suffering devastating consequences.

We are working together with other cancer and health organizations worldwide to provide support to Ukrainian cancer patients.

We urge Russia to stop bombarding hospitals and other civilian facilities and to allow for humanitarian corridors to be open to provide support for the Ukrainian people.

We urge European, American and worldwide decision makers to provide organized help to all Ukrainian cancer patients, so that their treatment can be continued. Countries that are receiving war refugees also need help with infrastructures, medicines and human resources.

We unite with the world and pray for peace to prevail.
